

## Förderung und Herstellung von Chancengleichheit zwischen Frauen und Männern in Wissenschaft und

### Forschung

**M.Sc. Marina Zempeltzi**

"I am in the final stages of my PhD and am writing my dissertation. Therefore, at first moments home office sounded like the optimal situation for me to concentrate on writing. In fact, it helps. But as a PhD student who was involved in many activities, I used to spend many hours at the LIN. I love being with my colleagues and working in the lab or meeting in several groups. This is what I miss the most. Not being able to travel back home (Greece) has affected me mentally most.

I wish that we quickly get over it, with all our beloved people healthy and safe. Looking the bright side of life...I hope that we all have learned new ways of living via this, by adding value to simple things."

**Marina Zempeltzi**, Phd Student, WG CortXplorer, Department Systemphysiology  
| Leibniz Institute for Neurobiology Magdeburg
